

## Einladung zum Vortrag

# The Hybrid Helicopter - Kopter's Approach to Modern Flight

Michele Riccobono  
Chief Technology Officer, Kopter

**Datum:** 6. Oktober 2022

**Zeit:** 17.30 Uhr

**Ort:** ETH Zürich, Zentrum / Hauptgebäude **Hörsaal:** HG E 3

Current helicopters need to become more sustainable, safer, more affordable and with extended operational capability. In the context of new operational scenarios (for example highly congested areas), manufacturers work hand in hand with authorities and operators to mitigate operational risks, simplify training procedures and improve public acceptance. Solutions that are being investigated include working on higher efficiency propulsion and lower CO2 output.

How much electric the helicopter can become, at which pace and for which use?

*Lecture in English language*

***Wir freuen uns auf Ihre Teilnahme. Gäste sind herzlich willkommen.***
